## STAGE

We required a stable stage, **6m x 4m minimum** for a good performance.  
If it possible, we appreciated a very stable **drums riser 2x2 h.40/60 cm!**  
All our equipment are 230V/50hz.

## AUDIO

We need a good P.A. system (we love D&B, L'acoustic, Martin Audio..!)  
with a good coverage in all the venue and nice sound pressure.  
We reserve our sound engineer to check and set the P.A. if it need it.  
One mixer with **32 channel, 8 auxiliary and 8 subgroups**, minimum.  
We like analog mixers, but we can work greatly with all the digital mixers  
(preferred Avid S6L/Profile, Digico SDx, Midas Pro/M32, X32, yamaha,  
Allen&heath.....)  
An our little rack with some outboards will used on FOH for special  
effects (..just delay and phaser!) We required **6 wedges** minimum on stage  
on **5 equalizable auxiliary**, with good SPL and quality (D&B M4 or  
MAX2, Martin audio LE1200, RCF TT25CXA...)
